3400 Series

Universal Testing Systems

For over 75 YEARS the Instron® brand has been widely recognized for producing some of the most advanced mechanical testing systems in the world. Our systems are designed by industry experts, vetted by active members of major standards organizations, and supported by a global network of skilled and experienced service technicians. This comprehensive approach allows us to back each Instron system with an unmatched level of industry and application expertise designed to support it throughout its lifetime.

1500+ employees
A highly-educated, experienced, and diverse workforce

Representing 160 countries, speaking 40+ languages

50,000+ systems installed worldwide

75+ years of engineering and manufacturing testing systems

Diverse product range for nearly all global markets and industries

SOLUTIONS FOR ALL OF YOUR TESTING NEEDS

Application-Based Testing Solutions

The 3400 Series universal testing machines range in capacity from 500 N to 300 kN and are designed to meet all of your force testing needs. Instron's patent-pending Operator Protect system architecture makes the 3400 Series simpler, smarter, and safer than ever before.

For low force applications, the 3400 Series single columns provide up to 5 kN capacity available in standard and extra height options.

Table Model Testing Systems

For higher force applications, the 3400 Series dual column table models provide up to 50 kN capacity available in standard and extra height options.

SCAN THE QR CODE to learn more and see the 3400 Series in action.

Floor Model Testing Systems

For the highest force applications, the 3400 Series floor models provide up to 300 kN capacity available in short base and tall base options.

HOW WILL THE 3400 SERIES MEET MY NEEDS?

Application-Based Testing Solutions

Instron® systems are routinely found in industries that require the testing of plastics, metals, elastomers and packaging. Some of our key applications can be found in the biomedical, automotive, electronics, and raw materials industries.

The 3400 Series universal testing machines are designed to perform tensile, compression, flex, peel, puncture, friction, shear tests and more. The systems are compatible with hundreds of grips and fixtures found in Instron's expansive accessory catalog.

SCAN THE QR CODE to see Instron's full Accessories Catalog.

Tensile Testing

- Pneumatic Side Action Grips
- Eccentric Roller Grips
- Wedge Action Grips
- Webbing Capstan Grips 04
- Cord and Yarn Grips 05
- Screw Side Action Grips
- Hydraulic Wedge Action Grips

HOW WILL THE 3400 SERIES MEET MY NEEDS?

Application Based Testing Solutions

Compression and Flexure Testing

- O1 Syringe Compression Fixture
- O2 Component Test Plate and 3-Jaw Chuck
- O3 Perforated Compression Fixture with Swivel Platen
- 04 Compression Platens
- 05 Three-Point Bend Fixture

Peel, Tear, Puncture, and Friction Testing Solutions

- 50 N Pneumatic Side Action Grips
- Coefficient of Friction Fixture
- T-peel Test with Side-Action Grips
- Variable Angle Peel Fixture
- 10 Ball Burst Puncture Fixture

SIMPLER

Powered by Bluehill® Universal

The 3400 Series universal testing systems are powered by Instron's Bluehill Universal software. Equipped with easy-to-understand icons and workflows, Bluehill Universal makes it simple to train users and set up tests, helping you maximize lab efficiency while minimizing costly errors.

QuickTest

For when you need results fast, QuickTest allows you to enter a few simple parameters and run your test within seconds.

Pre-Loaded Templates

Bluehill Universal includes an extensive library of pre-configured methods for some of the most commonly used ASTM, ISO, and EN standards. The methods are packaged in modules that are specific to your testing application.

Prompted Tests

Workflows guide you through the entire testing process with step-by-step instructions, ensuring that your tests remain repeatable, simple, and error-free. The prompts are customizable with your own text and images.

TestProfiler

Build simple cyclic tests that include ramps, holds, and triangle waves. Conditional logic allows you to create looping patterns that help re-create real-life scenarios within tests.

TestCam

Connect a USB webcam to experience point-by-point video playback, allowing you to view the test even after it has finished.

SAFER

Safety Without Sacrificing Throughput

Operator Protect

The 3400 Series is built on Instron's patent-pending Operator Protect architecture. An intelligent workflow keeps equipment and operators safer by controlling system status from setup to test completion.

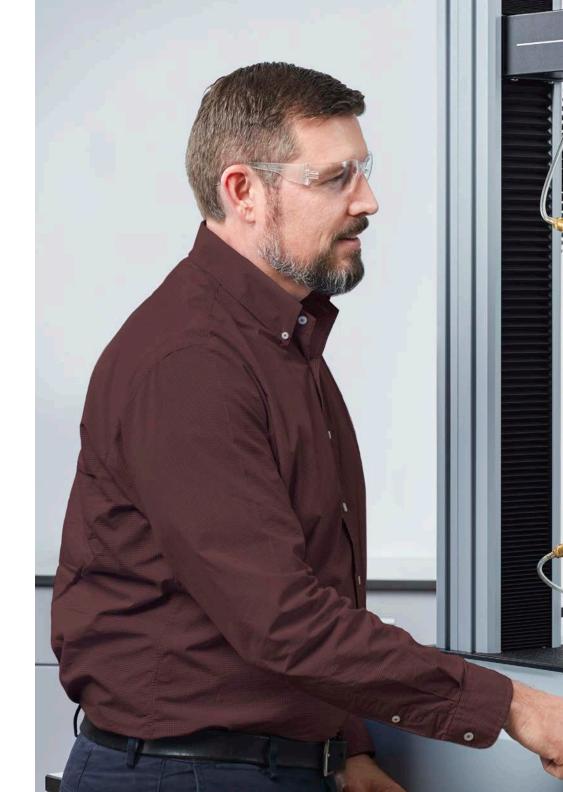

Built-in Safety Coaching

The 3400 Series provides clear visual feedback regarding the system status at all times, making it easy to understand when the system is in a safe setup mode. It also provides a clear reminder to exit the test space once these safety limits are removed.

Smart-Close Air Kit

Finger pinch hazards from low-force pneumatic grips are reduced through lower grip-closing pressure and restricted speed during the setup phase of your test.

Operator Panel

The 3400 Series brings system controls closer than ever before with the all-new operator panel. Improve ergonomics and throughput by starting and stopping tests, jogging the crosshead, and returning to the starting position directly from the instrument.

Status at a Glance

Monitor the system status with indicator lights and corresponding Safety Coaching messages in Bluehill® Universal.

Variable Speed Jog

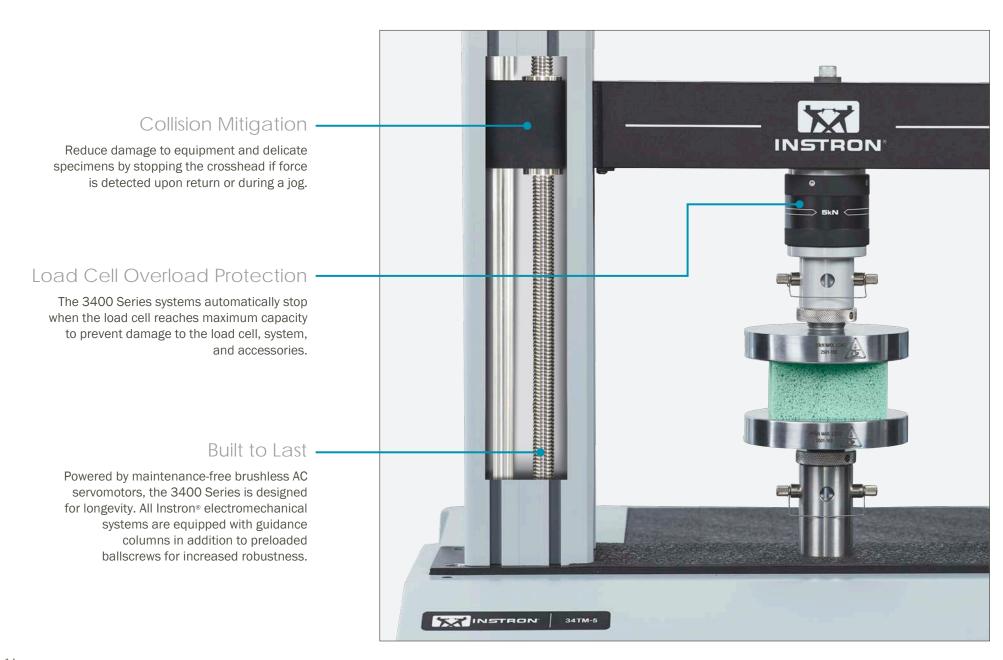

During set up mode, your system will default to a safe speed appropriate for an operator to work in the test space.

Virtual Interlock -

With Instron's patent-pending system architecture, the machine's movement is restricted to prevent unintended motion of the crosshead.

SMARTER Protecting Your Investment

SUPPORT FOR THE LIFE OF YOUR EQUIPMENT

Protecting Your Investment

Instron® is one of the largest suppliers of materials testing systems in the world. Our reliable testing systems are designed to run critical tests 24 hours a day. However, if something does go wrong, or if you have a question, we offer a variety of resources to ensure you receive the assistance you need as soon as you need it.

Instron Connect

Instron Connect allows you to securely share your screen with Instron service professionals and submit service requests directly through your test system. You can also use this portal to easily send test methods and sample data files for review.

Mobile Support

Instron offers access to a troubleshooting tool that can help you self-diagnose issues with easy to follow steps created by our technical experts.

Training

Training courses are available on-site, regionally, at an Instron factory, or online. Utilize our Applications Engineering Lab or Custom Solutions Group for all the latest technological advances in materials testing.

Calibration

Our state-of-the-art Calibration Laboratory offers a comprehensive range of accredited calibration and verification services complying with ASTM, ISO, and Nadcap standards for force, speed, strain (extensometers), displacement, impact, temperature, torque, creep, strain gauge channel, and alignment.

On-Site Services

When on-site assistance is needed, our team of 300+ global Field Service Engineers can help get you back up and running. Our factory-trained technicians are located all around the world and speak 40+ languages to help solve problems no matter where they occur.

SPECIFICATIONS & REQUIREMENTS

Data Acquisition Rate at the PC:

Up to 1 kHz simultaneous on force, displacement, and strain channels.

Load Measurement Accuracy:

 $\pm 0.5\%$ of reading down to 1/250th of load cell capacity. $\pm 1.0\%$ of reading down to 1/500th of load cell capacity.

Meets or exceeds ASTM E4, BS 1610, DIN 51221, ISO 7500-1, EN 10002-2. JIS B7721, JIS B7733, and AFNOR A03-501 standards.

Strain Measurement Accuracy:

Meets or exceeds ASTM E83, BS 3846, ISO 9513, and EN 10002-4 standards.

Displacement Measurement Accuracy:

 ± 0.02 mm or 0.15% of displacement (whichever is greater).

Testing Speed Accuracy:

(Zero or constant load) ±0.2% of set speed.

Notes

These specifications were developed in accordance with Instron's standard procedures and are subject to change without notice. All systems conform to all relevant European standards and carry a CE mark.

1. Applies to all 34SC and 34TM systems. 34FM systems support 208 to 240 VAC -5% / +10%.

2. Applies to 34FM-100 and 34FM-300 systems.

Single Phase Voltage¹:

100, 120, 220, or 240 VAC ±10%, 47 to 63 Hz.

Three Phase Voltage²:

208 to 240 VAC -5% / +10%, 47 to 63 Hz.

Operating Temperature:

+5 to +40°C (+41 to +104°F)

Storage Temperature:

-25 to +55°C (-13 to +131°F)

Ingress Protection (IP) Rating:

IP 2X. Protective measures may be required if excessive dust, corrosive fumes, electromagnetic fields, or hazardous conditions are encountered.

Humidity Range:

+10 to +90%, non-condensing at 20°C

THE WORLD STANDARD

We stake our reputation on the integrity of data. From the measurement of primary test data to result generation, we design and manufacture the full data integrity chain (e.g. load cells, sensor conditioning, and software). Additionally, we calibrate more than 90,000 of these sensors annually with the lowest accumulated uncertainty.

30,000+

We service and calibrate more than 30,000 Instron systems in active use worldwide every year.

96%

96% of the Fortune 100 list of the world's largest manufacturing companies use Instron test systems. 18,000+

Instron systems have been cited in more than 18,000 patents since 1975.
