

# EPO BLACK HOT MOUNTING MATERIAL

Optimize your mounting process with the new EPO BLACK

QPREP EPO BLACK is a fine granular, epoxy resin based thermosetting hot mounting material.

## PRODUCT ADVANTAGES

- | Very low gap formation
- | High edge retention and plane parallelism
- | Low-dust, easy cleaning and no ram adhesion
- | No labelling required
- | High content of mineral filler
- | Hardness (Shore D): 93
- | Removal rate: Very low

## RECOMMENDED APPLICATIONS

- | Routine applications
- | Edge examination
- | Mounting of medium-hard to hard materials

## WHAT HAS CHANGED?

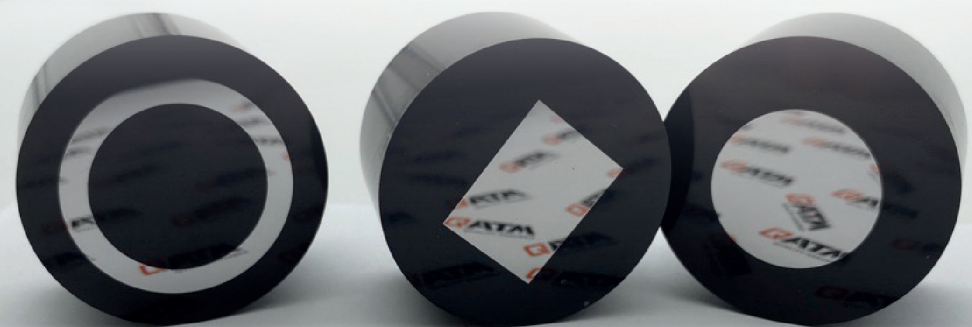

QATM offers a newly formulated hot mounting resin, and is pleased to introduce it's new product.

## WHAT IS THE NEW?

- | **No need for labeling** - significantly improving occupational **safety**
- | Low-dust
- | **No adhesion** to hot press ram (no need for anti-stick agents).

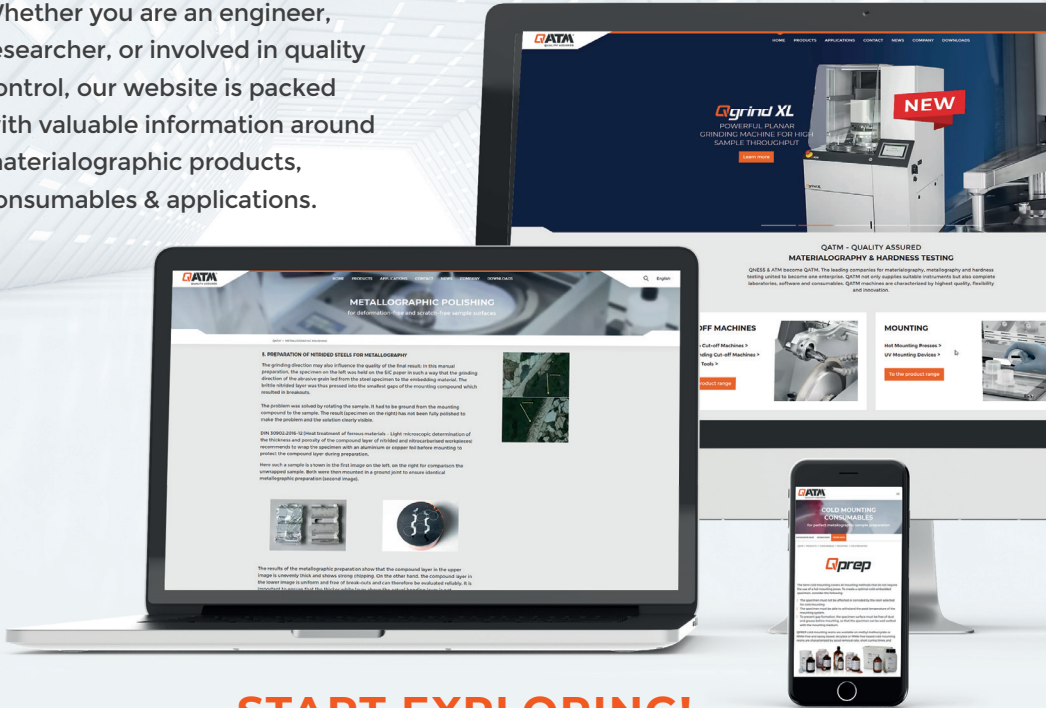

## WHAT DO YOU NEED TO KNOW?

To achieve the best mounting results, adjust your process times and add 45-60 seconds to your previous heating cycle.

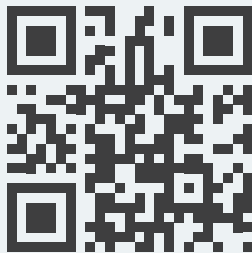

# MATERIALOGRAPHIC SOLUTIONS ON DEMAND!

Whether you are an engineer, researcher, or involved in quality control, our website is packed with valuable information around materialographic products, consumables & applications.
